

L'Unione Europea vuole un mercato unico e la libera concorrenza

The European Union wants a single market and free competition

A **settembre 2011** ho dato un mio personale contributo alla UE per la modernizzazione del mercato unico e per l'abolizione delle barriere allo sviluppo economico. A **ottobre 2011** sono stato invitato a Bruxelles per partecipare a una conferenza pubblica sulla liberalizzazione. A **novembre 2011** ho partecipato al meeting e sono ritornato in Italia con ottime notizie. In breve, anche a causa della crisi economica mondiale, è necessario fare **rapidamente** due cose: 1) **massimizzare** la libertà di circolazione dei professionisti, e 2) **minimizzare** i requisiti formativi necessari per tutelare i consumatori.

In **September 2011** I've personally contributed to the EU efforts to modernize the single market and to abolish the barriers against the economic growth. In **October 2011** I have been invited to join a public conference in Brussels about the liberalization process. In **November 2011** I attended the meeting, and I came back to Italy with excellent news. In short, also in consequence of the world crisis, it is necessary to do **quickly** two things: 1) to **maximize the** freedom of movement of the professionals, and 2) to **minimize** the training requirements that are needed in order to protect the consumers.
